Profile

software engineer with a track record of success in both self-driven and collaborative work environments. I excel at delivering high-quality results within tight deadlines while maintaining a sharp focus on achieving excellence. My expertise lies in React, Next, TypeScript, JavaScript, and Node.js. I am constantly driven by a strong desire to learn and embrace new technologies, enabling me to expand my skills continuously.

Professional Experience

Front end developer, *Invest Group - Citadeli Office*

09/2022 – present

I've gained extensive experience in my current role, working on two CRM projects that involve big data and complex logic.

In the first project, which is a real-time web application, we utilized React.js and PHP for front-end and back-end development respectively, enabling us to handle large amounts of data efficiently.

In the second project, we opted for Next.js with TypeScript, ensuring optimal performance and scalability while managing intricate business logic.

Full Stack Developer, *WebSmart*

09/2021 – 07/2022

Tbilisi (partly remote)

I developed a single-page application using React with TypeScript, ensuring a seamless and dynamic user experience. Additionally, I took charge of building the backend system from scratch, utilizing Express and MongoDB.

I also had the opportunity to work on the company's CRM platform. I collaborated with the team to enhance and optimize the CRM system, ensuring effective customer relationship management and streamlined business processes.

Skills

LANGUAGES : HTML, CSS, JAVASCRIPT, TYPESCRIPT

Technologies: React, Next, Node, Express

SM Libraries: Redux, MobX, Zustand,

Design Libraries: Bootstrap, Ant, Tailwind CSS

Education

Bachelor Degree / Business and Technology, *Ilia State University*

09/2018 – 07/2022

Tbilisi, Georgia

SCIENCE, TECHNOLOGY, AND ENGINEERING, *Udemy*
